Education

Sree Vidyanikethan Engineering College Tirupati
Computer Science B. Tech January 2021 - June 2024
CGPA: 7.94/10.00

Narayana Junior College Anantapur
Mathematics, Physics and Chemistry Intermediate June 2018 - June 2020
CGPA: 9.23/10.00

Sri Saraswati Vidya Mandir High School Pamidi
Telegu, Hindi, English, Mathematics, Science and Social Science Secondary Education June 2017 - March 2018
GPA: 9.2/10.0

Experience

Sync Interns | Python Programming Intern virtual | July 2023 - August 2023

Developed and delivered multiple Python projects, including an Alarm Clock, OTP Verification system, URL Shortener, and Chatbot, during a dynamic 1-month internship, showcasing expertise in programming concepts and problem-solving skills.

Oasis Infobyte | Web Development and Designing Intern virtual | May 2023 - June 2023

Developed and implemented a Temperature Conversion Calculator, Tribute Page, and interactive To-Do Web app during a 1-month web development and design internship; gained proficiency in HTML, CSS, and JavaScript, while showcasing ability to deliver high-quality projects.

Skills

Programming Languages:	Python, C, HTML, CSS
Libraries/Frameworks:	Numpy, Pandas
Tools/Platforms:	VS Code, GitHub, Microsoft Word, Excel, PowerPoint, Google Colab
Databases:	SQL

Projects

JourneyHub: Interactive Travel Website | Link HTML, CSS, JavaScript

Collaborated with a cross-functional team of developers to successfully launch a dynamic travel website using HTML, CSS, and JavaScript, resulting in a visually appealing platform showcasing our collective web development expertise. Demonstrated effective teamwork and ability to deliver impactful projects during college.

Web-Based Calculator Application | Link HTML, CSS, JavaScript

Developed and deployed an interactive web-based calculator application utilizing HTML, CSS, and JavaScript, enabling users to perform complex arithmetic operations with real-time calculations, enhancing user experience and engagement.

Python Alarmer: Set Alarms Effortlessly | Link Python, Tkinter, datetime, time, winsound

I developed a user-friendly alarm clock application using the tkinter library. This application allows users to input their desired alarm time, and it plays a custom alarm sound when the set time is reached, providing a practical and interactive time management solution.

PyShorten: Python URL Shortener | Link Python, Tkinter, pyshorteners, pyperclip

Developed a user-friendly URL Shortener application using Python's tkinter library and integrated it with the pyshorteners library for URL compression. The project allows users to generate and copy shortened URLs effortlessly, showcasing strong UI design and web-related skills.

Weather Chatbot using python | Link Python, JSON, WebScraping

I developed a Weather Chatbot in Python that retrieves real-time weather information for user-speci ed locations using an API. It provides temperature and weather condition details and is designed for user-friendly interaction.

PythonOTP: Secure Verification System | Link Python, random, smtplib

I've created an OTP (One-Time Password) verification system using tkinter and SMTP. Users can request an OTP via email, and upon entering the correct OTP, they receive a "Successful Verification" message. It's a simple, user-friendly way to enhance security for various applications.

Web-based Temperature Converter Application | Link HTML, CSS, JavaScript

Designed and developed a web-based Temperature Converter application using HTML, CSS, and JavaScript, allowing users to easily convert between Celsius, Fahrenheit, and Kelvin. Implemented a responsive and user-friendly interface for seamless temperature conversion.

TaskTrak: To-Do List Manager | Link HTML, CSS, JavaScript

Developed a user-friendly web-based To-Do List application using HTML, CSS, and JavaScript, allowingusers to efficiently manage their tasks. Implemented features for task creation, editing, and completion, enhancing productivity and organization.

Certifications

Data Structures and Algorithms in Python - Coding Ninjas

Introduction to Python - Coding Ninjas

C for Everyone: Programming Fundamentals - Coursera

Honors & Awards

Won 2nd prize in Business Ideas Pitch Competition conducted by Sree Vidyanikethan Engineering College
